

INDIVIRTUS ECOLOGICAL SERVICES PVT. LTD.

About Us:

Indivirtus is a group of companies, embodying virtuousness, character, courage, transparency, and truthfulness, offers cost-effective solutions with a focus on quality deliverables. **Indivirtus Ecological Services Pvt Ltd**, in association with our technology partner **M/s Vadic Srijan LLP**, leverages the Indian Knowledge System (IKS) for **total climate resilience by restoring and rejuvenating water bodies** (a conjunction point for air and soil), thereby addressing critical issues such as:

- + Global warming
- + Urban flooding
- + Biodiversity loss
- + UHI & PVHI effects
- + Antimicrobial Resistance
- + Desertification
- + Public Health & Vector-borne diseases

Our mission is to provide sustainable solutions while promoting environmental stewardship.

Our Technologies

Three step process –
Resurrection,
Restoration and
Rejuvenation

1

2

No need to Stop any
inlets (Sewage/ Nallah/
Industrial Effluents etc)

6

Key Features

5

4

One time removal of
Floating Weeds,
Plastics or other non-degradable items

In-Situ process –
No de-watering

3

Use of 100% botanical
extracts

No Sludge Removal -
Sludge is used as
nutrients for aquatic

How it works

- Use of botanical Extract (Cownomics technology – Eco Friendly, Sustainable, Nature based Solution)
- No Mechanical dredging ,No Biological process, No chemicals
- "Eco-dredging," naturally consumes bottom sludge deposits, maintaining the waterbody's natural holding capacity and healthy soil capillary links, leading to perennial fresh water.
- Converts water into reducing agent and decomposition process speeds up resulting in oxidation of solids in water
- Increased dissolved O₂ also kills disease borne anaerobic bacteria

Scientific outcome

Measurable Impact

Short Term

- Free from Odor
- Sludge decomposition
- Potable water for general purpose
- Free from Mosquitoes – Better health index
- Revival of Aquatic life
- Flora & Fauna (Expansion of Native Plant and Animal Species)
- No regrowth of Water Hyacinth and other weeds
- Considerable reduction in water and vector borne diseases

Long Term

- Less probability of Flood/ drought
- Rainwater recharge due sludge decomposition
- Reduced air pollution/ Solid particulates
- Better aquatic ecology
- Improved Air, Water , Soil quality
- Improved Groundwater level
- Better socio-economic index
- Water body becomes low in viscosity and becomes wavy

Journey till date

EVIDENCE BASED CASES

**61**

Completed projects

**300+**

Acres of Waterbodies saved

**2+**

Million people saved from Water borne diseases

**100+**

Million liters of ground water recharged

**100+**

Million Liters of Sewage treated every day

**3+**

Million people saved from Air Pollution

**2+**

Million people saved from vector borne diseases

**100+**

Species saved through biodiversity conservation

20+

Ongoing projects

Vajdic Srijan

60+

Completed projects

AWARDS & ACCOLADES

Conservation of Biodiversity
Good Air Award
(IWH Council) 2025 & 24

1

Award for Science & Technology in Water Sector (World Federation of CSR) 2025 & 24

2

BRICS Solutions Award (2024)

3

Thematic Excellence Award of TSEC2024 (The Tata Social Enterprise Challenge)

4

National Award for Excellence in Water Management (CII) 2023

5

Certificate of Appreciation (NIDM, MHA) 2023

6

Best Environmental Startup in UP (Startup in UP) 2023

7

ESG Enabler Technology of the year (MNRE & Indian ESG Network) 2023

8

Certificate of Appreciation (CRDT-IITD) 2023

9

RC Mishra
Nature Care Award
(Nature Care Initiative) 2023

10

Technology Partner for AMRUT 2.0 (MoHUA)

11

Global Top Author (SWM Spain)

12

Idea Worth Spreading (TED, USA)

13

Water Hero (Ministry of Jal Shakti)
